

Tech, Video Games & Emerging Media

Real-time counselors to serial entrepreneurs, industry veterans, and their ventures.

We counsel seasoned teams of industry veterans who exit large enterprises and entrust tomorrow's innovations to their own hands.

We advise singular serial entrepreneurs who cycle, one venture to the next, through the startup ecosystem.

Along the way, we help these clients form companies, harness IP, raise financing, navigate complex inbound and outbound licensing arrangements, systematize their business models, and optimize liquidity events.

We are "outsourced general counsel" covering founder, corporate, securities, licensing, distribution, commercial and M&A matters for unique ventures destined to succeed, yet jealous for the field-leveling advantages brought by experienced, proactive, high touch, boutique legal counsel. (And yes, with the chops to bring or defend a fight when strictly necessary.)
